CELEBRITY EYE STYLE

From red carpet events to hanging with friends, celebrities show that they have eye style. But how do the stars' specs stack up? Deborah Lochli-McGrath, optician and spokesperson for The Vision Council, grades these celeb styles and gives her expert opinion.

Justin Timberlake

Justin Timberlake makes geek chic his own with these frames. The size of the frame is in proportion to his face, but the strong browline slightly accentuates his wide forehead and narrow chin. He should look for frames that add width below his eyeline to offset his chin; otherwise, he looks great! I give JT a B+.

Eva Mendes

Eva Mendes looks absolutely gorgeous here. These frames give her an ultra-chic look. Her oversized square shades with dark gradient lenses give her a classy yet mysterious vibe. They fit her well and are in balance and proportion with her face. I would give Eva an A.

Jay-Z

I'm thrilled to see Jay-Z embracing eyeglasses! He's been spotted everywhere in oversized, retro-inspired frames. Jay-Z has an oval-shaped face and these glasses keep the natural balance of his face. They are wider than the broadest part of his face. Oval faces have many options in eyewear as long as frames are proportionate. That being said, it would be great to see Jay-Z in some other eyeglass styles, which earns him an A-.

Kim Kardashian

Kim Kardashian is a knockout in these sleek, oversized frames. While these are great frames, they may not be just right for her. The frames appear to not fit her correctly as they seem to be sliding down her nose. She should look for something that gives her a great overall fit. I would give Kim a B.
